

GIVING WITH TEXT MESSAGES

You can give securely with your cell phone using our Text-to-Give program. Follow these steps to give to your church through text message:

To give through text message, text one of the commands below to the unique text number provided by your church:

GIVE (amount) - creates a one time donation to the default fund.

GIVE WEEKLY (amount) - creates a weekly donation to the default fund. The donation runs the next day for the first time, then every week thereafter.

GIVE MONTHLY (amount) - creates a monthly donation to the default fund. The donation runs the next day for the first time, then every month thereafter.

STATUS - displays a list of recurring donations and their status.

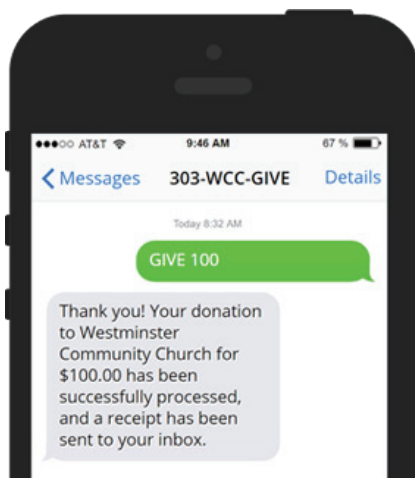

HISTORY - displays a list of the last five donations given, regardless of method.

SUPPORT - displays a list of available commands.

You'll need a GivingFire account to use Text-to-Give with a saved phone number and payment method. If you don't have that, no worries! GivingFire will respond through text message to walk you through a quick setup process. Additionally, you can save payment methods on your church's main donation page, or manually in your donor dashboard. Once you've made one Text-to-Give donation, you'll be able to automatically make future text donations with no additional setup.

Once a text donation has successfully been made (or scheduled, in the case of a recurring donation), we'll text you a confirmation and send the usual email receipt. As with all donations on GivingFire, Text-to-Give donations are tracked alongside other donations and are available in all of GivingFire's reporting options.
